📋 OBJECTIVES

I am currently pursuing a Bachelor's degree in Computer Engineering from the University of Engineering and Technology with a strong passion for web development and Coding . I have hands on experience in building responsive and user-friendly web applications using HTML, CSS, and JavaScript. Additionally, I also have an experience in modern technologies such as React.js, Node.js, Express.js, ,Mongo DB and TypeScript to develop scalable and efficient backend and full stack solutions.

I enjoy solving complex problems and continuously enhancing my skills through real-world projects and practical learning. My goal is to become a proficient full-stack developer and contribute to innovative, impactful technology solutions.

🎓 EDUCATION

06/2022 – 04/2024
Talagang

Fsc-Computer Science

Punjab College

- Fundamental concepts of computer programming including logic building and problem solving

08/2024 – Present
Taxila

Bachelor of Science (BS) in Computer Engineering

University of Engineering And Technology

- Proficient in HTML, CSS, JavaScript, C++, and Java
- Familiar with TypeScript and modern JavaScript
- Developing analytical, technical, and problem-solving skills through academic coursework and practical projects
- Dedicated to continuous learning and professional growth in the field of technology and engineering

🧠 SKILLS

- | | | | |
|--|----------------------|------------------------------|----------------|
| • Microsoft Office Suite (Word, Excel, PowerPoint) | • Project Management | • Full-Stack Web development | • Html |
| • C++ | • Java | • C++ | • Git & Github |
| • JavaScript | • React.js | • Express.js | • TypeScript |
| • Communication skills | • Proteus | • Matlab/Simulink | |

🌐 LANGUAGES

- | | | |
|-----------|--------|----------|
| • English | • Urdu | • Arabic |
|-----------|--------|----------|

INTEREST

Web and software development | Hardware and software integration | Problem Solving |
Learning New Technologies | Embedded System Design | Matlab/Simulink

PROJECTS

- | | |
|-------------------|--|
| 01/2026 – 01/2026 | Smart Precision Agriculture System
<i>An IoT-based precision agriculture system that monitors soil moisture, temperature, and humidity across multiple zones, enabling automated irrigation and real-time remote monitoring using Blynk.</i> |
| 03/2026 – 03/2026 | Weather Forecast Application
<i>React, JavaScript, OpenWeather API</i>
A responsive weather application that provides real-time weather forecasts, temperature, humidity, wind speed, and location-based weather information using REST APIs. |
| 09/2025 – 09/2025 | Hospital Management System
A full-stack Hospital Management System featuring patient, doctor, appointment, billing, and medical record management with JWT authentication, role-based access control, Swagger API documentation, and a responsive React dashboard. |
| 09/2025 – 09/2025 | Expense Tracker Dashboard
<i>HTML5, CSS3, JavaScript, Chart.js</i>
A responsive expense management dashboard featuring transaction tracking, budgeting, analytics, category-based charts, CSV import/export, and interactive financial reports. |
| 08/2025 – 08/2025 | Student Management System
<i>Java, Spring Boot, MongoDB</i>
A RESTful student management application supporting CRUD operations, validation, pagination, search functionality, and secure backend architecture. |
| 06/2025 – 06/2025 | ATM Simulator Project - C++
<i>(File Handling, OOP Concepts)</i>
Developed an ATM simulator that performs withdrawal, deposit, balance inquiry, and fund transfer operations using file handling for secure data storage and retrieval. |
| 05/2025 – 05/2025 | Temperature Detector with Automatic Fan Control
Designed a Temperature Detection System that automatically activates a fan when temperature exceeds a preset limit. |
| 02/2025 – 02/2025 | Online Cab Booking system(OOP Concepts)
Implemented Object-Oriented Programming (OOP) concepts including classes, objects, inheritance, encapsulation, and polymorphism for structured and maintainable code. |
| 11/2024 – 11/2024 | Health Management Website
Developed a Health Management Website designed to track patient records, appointments, and health statistics, integrating user-friendly interfaces and secure data handling features. |
| 11/2024 – 11/2024 | Water Level Indicator (Arduino-Based Project)
Developed an Arduino-based Water Level Indicator to monitor water levels in a tank and provide real-time alerts when the tank reaches low or high levels. |
| 12/2024 – 12/2024 | Fitness Purpose Gym Clone
Developed a fully responsive gym website clone using HTML, CSS, and Tailwind CSS |

EXPERIENCE & WORK

Abdanix Internship (6 week Internship)

MERN-STACK-DEVELOPMENT

I have Gained a Lot of Experience in building **Web Design** and also How to Manage the Data Using **Mongo DB** And **Postman linking** different technologies i have used to build a scalable and user responsive design

FREELANCER(03,2023)

Fiver/Upwork

I am also currently working as a freelancer and have done many projects and delivered at time clients are so happy and now they start working with me.

Code Alpha (8 weeks)

C/C++

I have completed my internship and after that i am able to rewrite and debug any code in C/C++ and also i have gain a practical experience that how to handle **Student Database** and also i have worked with multithread **Chat Applications**.
